weas@weasengineering.com

Weas Engineering is a water treatment and consulting firm. We offer a wide range of treatments for Potable Water from NSF disinfectants and NSF scale & corrosion inhibitors to ultraviolet light. With the ever-growing concern towards waterborne pathogens, such as *Legionella*, recent industry regulations and aging infrastructure, potable water treatment is becoming more and more prevalent. There are many disinfectants and applications in the industry, so consult with your Weas Engineering Representative and your Water Management Program (WMP) Team to decide on the best application for your facility.

Weas Engineering Potable Water Treatment Offerings:

NSF Chlorine Dioxide Solution

Chlorine Dioxide Generators

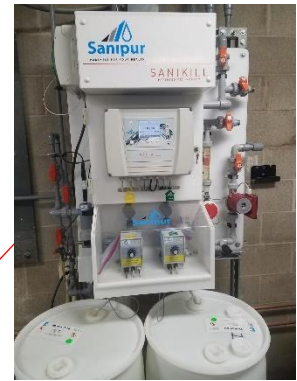

Chlorine Generators

Disinfectants:

1. Chlorine
2. Chloramine
3. Chlorine Dioxide
4. Ultraviolet Light

NSF Scale & Corrosion Inhibitors:

1. Silicate-based
2. Phosphate-based

NSF Sodium Hypochlorite (Chlorine)

Monochloramine Generators

Ultraviolet Light

NSF Scale & Corrosion Inhibitors
